

**For over 30 years VMG has been carrying out the award winning restoration of Rolls Royce and Bentley cars.**

In 1972 Max Houston established VMG and set the standards for restoration of vintage and classic cars in Australia. Today Jonathan Houston continues the excellence of enduring quality and reliability.

VINTAGE MOTOR GARAGE

**Award Winners by VMG**

VMG offers full in-house restoration services. A fully equipped machine shop for the reproduction and reconditioning of any mechanical component, from poured and bored white metal engine bearings to the manufacture of one off door locks and everything in between. Our mechanics are highly skilled in the repair, assembly and servicing of all types of vehicles. The body department includes a coachbuilding workshop where all types of timber framed bodies are designed and built or repaired, custom made drinks cabinets produced and old internal cabinet work meticulously restored. Of course we also employ the best panel makers and beaters in our panel shop where any panel or sheet metal component such as headlight and radiator shells can be repaired, reproduced or individually manufactured. No restoration would be complete without fantastic paintwork or a top quality interior – at VMG we have our own paint shop and spray booth where some of the best paintwork in the country is produced, and our upholstery shop is second to none.
